

CAR-T5

Intermittent Horizontal Cartoning Machine

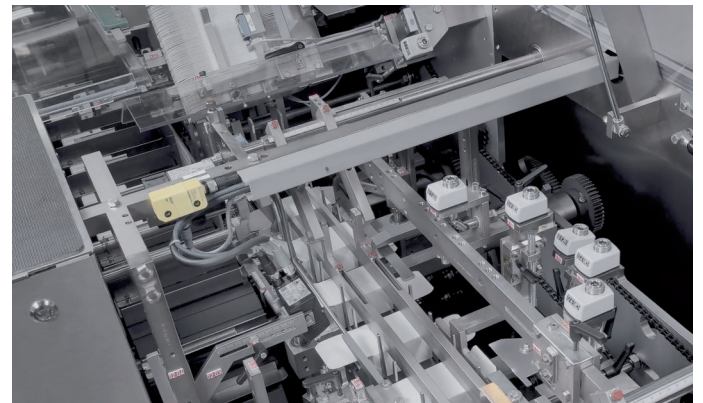

Maximum flexibility for your secondary packaging

blisters and trays. Due to a modular design the machine is capable to run products with different add-ons or inserts, like a spoon, booklet or pre-folded leaflet. Since it is equipped with the appropriate infeed system, the intermittent machine platform is able to run various speeds bringing the benefit of reproducibility and performance to each of our customers.

Machine Highlights

- Compact and robust machine design with small foot print
- Specific and smart bottle infeed solution for bottles without product chain
- Highly flexible machine
- Real big number of machines in the market
- Leaflet feeding with separate leaflet gripper chain for secure transport
- Cost effective solution for excellent performance

Providing optimal protection for your product and operator convenience

The CAR-T5 is an innovative series offering unmatched performance capabilities at the right price. The system has a small footprint, excellent flexibility and numerous format/closure options. The cartoner can easily adapt to different carton sizes while providing a secure and gentle packaging process. In addition, the CAR-T5 is the perfect fit for standard products – such as bottles, vials,

Technical Specifications

Model	CAR-T5
